Artist's Statement

"Where individuality appears, that's the beginning of art" Pablo Picasso

I am a "wet into wet" oil painter quite addicted to the lushness one can achieve with oil paint, oil, varnish and turpentine.

For the most part, I am drawn to painting the organic figure within the geometry of a room, an outdoor setting or a contrived space. It is the contrast between the organic and geometric forms that interests me, my ultimate goal to have the forms support one another and create something universal in their unison.
